How to conduct "fumettivoice"
 BY JOSEPH HARDING, PHD CANDIDATE, UNIVERSITY OF MANITOBA

1. Scope out the image you want to capture. Ensure the image links to the context of organic Waste Management surrounding the theme of the next Focus group. Take a photo with your camera (JPEG format), avoiding any images that identify people or key places, ensuring the image is ETHICAL (causes no harm).
2. Note down the significance of the image you captured using the SHOWeD method*. Pair the following description critically with your image:
 - What do you See here?
 - What is really Happening here?
 - How does this relate to Our lives?
 - Why does this situation Exist?

6. Photo Comic Method and SHOWeD (25 mins)
